

HAINES BOROUGH LUTAK DOCK

DESIGN & CONCEPT DEVELOPMENT

www.LutakDock.com

Project Overview:

Lutak Dock is a deep water port originally constructed in 1953. Modifications, repairs and partial replacements to the dock have been incrementally occurring since 2003 in order to maintain the dock's working condition. Through this project, the Haines Borough is considering options for replacing or refurbishing the Lutak Dock with the purpose of:

- Securing the integrity of the existing facility;
- Maintaining existing working area and functionality;
- Maximizing life expectancy; and
- Providing a design that allows for expansion of the facility in the event of future demand.

Design Option 1:

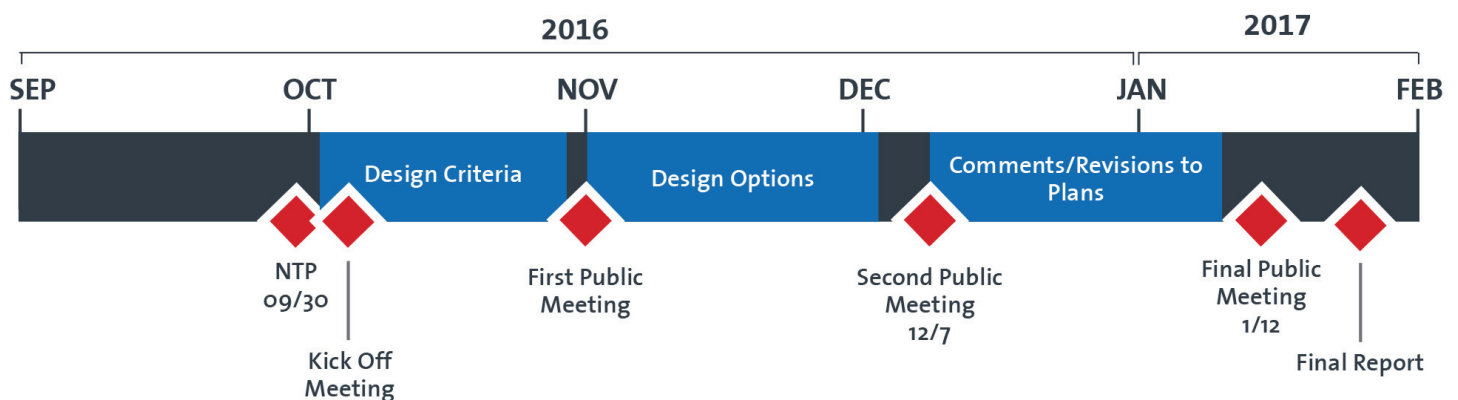

Encapsulating the dock structure with new sheet pile walls, keeping the existing dock size and functionality.

Design Option 2:

Replacing the existing dock with a like size and capacity facility.

Design Option 3:

Reinforcing the existing dock using a combined sheet pile bulkhead and pipe pile supported platform dock.
